

Lyme Disease

What is Lyme disease, and how is it relevant to me?

The Public Health Agency of Canada has identified Vancouver Island, the lower mainland and the Fraser Valley specifically as "Lyme disease endemic areas." Come and learn about the spectrum of symptoms that may indicate a Lyme, or Tick Borne Infection (TBI), and how we can evaluate and treat them.

TBIs have a major impact on many body systems, including the immune and nervous systems, and can significantly impact quality of life. Integrated Healthcare Practitioners are very well positioned to address these infections, as well as the many physiological complications that occur in conjunction with them.

Tuesday, March 12th, 2013 - 7:00 pm

Fort Langley Lions Seniors Hall

(23022 88th Ave, Fort Langley, BC) To *register call: 604-888-8325*

Come and hear about Naturopathic and Conventional treatment options with

Dr. Lindsay Adrian, ND, of Integrated Health Clinic,

with special guest **Dr. Ernie Murakami, MD**
